

Coal Mine Electronic Anemometer

Application

It is a new generation of intelligent digital anemometer; which can detect the average speed of wind in the working environment where flammable and explosive mixed gases exist with the characteristics of direct-reading display, high precision, data saving ,convenient to operate etc.

Main specification

Model	CFJD5	CFJD25
Type	Low velocity	Middle/high velocity
Measurement range	(0.3-5)m/s	(0.5-25)m/s
Tolerance	0.2m/s	0.3m/s
Starting air-velocity	≤0.2m/s	≤0.4m/s
Permittable zero drift	±0.1m/s	
Battery unit	700mAh (Ni-MH)	
Continously Operating hours	>18h	
Explosion-proof type	Exib I	
Dimension	50×25×155	
Weight	0.18Kg
